SUMMARY

Experienced in React.js, Node.js, and MongoDB, with a track record of building production-style applications including a multimodal AI-based deepfake detection system achieving 85% classification accuracy. AWS Certified Solutions Architect – Associate with strong fundamentals in DSA, OOP, REST APIs, and database design.

EDUCATION

B.E. in Computer Science and Engineering, Chandigarh University, Mohali	2023 – 2027
CGPA: 7.3	
Class XII, Government Senior Secondary School, Ellenabad	2021 – 2022
Percentage: 91%	
Class X, Nachiketan Model Senior School, Ellenabad	2019 – 2020
Percentage: 87%	

TECHNICAL SKILLS

Languages: HTML, CSS, Python, JavaScript, Java, C++, Python, SQL
Frameworks & Libraries: React.js, Node.js, Express.js, Spring Boot
APIs: REST APIs, API Integration, Speech Recognition API
Databases: MongoDB, MySQL, Firebase
Cloud & DevOps: AWS (Certified Solutions Architect – Associate), Git, GitHub, Docker
Tools: VS Code, Postman, Burno
Coursework: DSA, OOP, Operating Systems, DBMS

PROJECTS

Multimodal Deepfake Detector

Tech Stack: *React.js, Node.js, Express.js, Python, TensorFlow, OpenCV, MongoDB, Chrome Extension API, AWS*

- Engineered a multimodal deepfake detection system using TensorFlow and OpenCV, achieving 85% classification accuracy across image, audio, and video inputs.
- Built a Chrome extension and React.js interface integrated with a Node.js/Express REST API, reducing average content verification time to 4 seconds per file.
- Validated model performance across 300 test cases with results stored in MongoDB, cutting the false-positive rate by 12% through iterative tuning.

Blood Group Detection via Fingerprint Sensor

Tech Stack: *React.js, Node.js, Express.js, Python, Scikit-learn, MySQL*

- Developed a full-stack biometric application using Scikit-learn to predict blood group from fingerprint sensor input, achieving 84% prediction accuracy across 200 tested samples.
- Built a React.js frontend and Node.js/Express backend with MySQL data storage, reducing result generation time to under 2 seconds.

LinkedIn OAuth 2.0 Authentication System

Tech Stack: *React.js, Java, Node.js, Express.js, MongoDB, OAuth 2.0, JWT, LinkedIn API*

- Implemented a full-stack authentication system using LinkedIn OAuth 2.0 and JWT, reducing the login flow from 5 steps to 2 steps for 100+ tested users.
- Secured user sessions with token-based authentication via the LinkedIn API, passing 10 of 10 internal security validation checks.
- Architected a Node.js/Express backend with MongoDB session storage, supporting 50+ concurrent authenticated sessions without failure.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2025) | Udemy | Oct 2025
- Database and SQL | Infosys Springboard | Sep 2025
- AI for Entrepreneurship | Intel Technology India Pvt. Ltd. (Skill India Digital Hub) | Mar 2025
- Introduction to Databases for Back-End Development | Meta | Coursera | Jun 2026
